Abstract (en)  
The shoe sole has a torsion unit (220), which decouples a front area of the shoe sole with regard to a rolling motion line from a rear shoe sole area. The front shoe sole area and the rear shoe sole area are adhesively formed in a single piece, and have a clearly tapering width in an area of the torsion unit. The front shoe sole area and the rear shoe sole area stands in connection with one another by a base. An independent claim is also included for a shoe e.g. running shoe, with a shoe sole.
