Abstract (en)

It is an object of the present invention to provide a highly convenient game machine whereby a player can safely play a game. In the game machine of the present invention, the individual data of a player is read from a card inserted into a card reception part (721), and a game program is executed together with game input data that is input from input means (71). In this machine, the card is detected and a notification is issued if the player is not seated in the seat.
