Abstract (en)
[origin: EP1758359A1] A method for processing telephone call includes: access number configuration information corresponding to a called number is stored in an access number configuration equipment in a communication system; the calling party requests for the pre-call registration in the communication system, the communication system adds a corresponding pre-call registration record into a pre-call registration list according to the access number configuration information; the calling party initiates the call to the called party, after the communication system receives the call request of the calling party and before calling the called party, the communication system determines whether the calling party has been registered in the pre-call registration list, if the calling party has been registered, connects the call request and initiates the call to the called party; otherwise, refuses to initiate the call to the called party. In the method for processing telephone call according to the present invention, it is ensured that a called party would not miss important incoming calls when he does not want to be disturbed. A calling party can request for the pre-call registration by means of short message or Internet so as to call the called party.
