Abstract (en)

[origin: EP1607142A1] The dispenser device (10) has a drive (800) with piston (5) and guide rod (1). The piston (5) has two sides (5a,5b) remote from each other with the first side acting on the material (20) to be processed which is contained in a bag (200) inserted in the cylinder (9) whilst the second side acts on the material to be processed which is contained in the cylinder of a cartridge inserted in the device. The piston has a threaded bore running right through so that the piston can be screwed onto the threaded bolt (12) with either the first or second side facing the guide rod.
