Abstract (en)  
[origin: WO2005123495A2] The present invention relates to an arrangement in a watercraft, which watercraft comprises a hull structure (1), a board structure (3) and a cabin unit (5) arranged in conjunction with the board structure and comprising an inside space (52) and a balcony space (53). In order to widen the range of use of the cabin unit (5), the board structure (3) or the outer board (36) of the balcony space (53) included in the cabin unit (5) comprises an opening (31) in conjunction with the cabin unit (5), in which opening a movable board protection element (32) is arranged, which element can be moved between a first position (A), in which the opening is uncovered, and a second position (B), in which the opening is closed up, whereby the board protection element (32) in its second position (B) forms together with the board structure (3) of the watercraft or the outer board (36) of the balcony space (53) a tight construction, which withstands the loads exerted on the board structure or the outer board of the balcony space.
