Abstract (en)
[origin: WO2005105971A1] The present invention provides a bleach activator which is at least one macrocyclic manganese complex selected from the group consisting of [Mn<III>(rac-14-decane)X₂]Y, [Mn<III>(mes-14-decane)X₂]Y.H₂O and [Mn<III>(mes-14-decane)X₂]Y represented by Formulas 1-3, as well as a preparation method thereof. Also, the invention provides a bleaching composition and bleaching detergent composition comprising the bleach activator. The bleach activator comprising the manganese complex is used in a granulated form. Wherein X is at least one selected from chlorine (-Cl) and acetate (-OOCCH₃), and Y is an anion selected from Cl<->, Br<->, F<->, NO₃<->, ClO₄<->, OH<->, NCS<->, N₃<->, and PF₆<->.
