Abstract (en)

[origin: WO2005121514A1] Disclosed is an apparatus for purifying exhaust gases of an internal combustion engine, comprising a particle filter (4) that is provided with a catalytically active coating (8). Said catalytically active coating contains a carrier material (9) and an iron-containing material (10) which is joined to the carrier material and is provided at least on the surface thereof. The carrier material represents an aluminum silicate or a silicon oxide.
