Abstract (en)

[origin: WO2005124714A1] Surveillance system for automatic detection and presentation of threat indications, the system comprising several threat indication detectors (1, 2) and at least one central unit (3) adapted for communication with said threat indication detectors (1, 2) and for presentation of threat images. Threat information signals are transferred automatically from the threat indication detectors to the central unit, and each threat indication detector (1) can be located both immobile, semi-mobile or mobile.
