Abstract (en)  
The plant consists of a press (5) that produces at least one invariable pattern (150) on all the blanks (2), e.g. of sheet metal, in a batch (L) in a single operation, and at least one other machine (6) that is capable of creating one or more patterns on at least some of the blanks in the batch in a series of successive operations. It has drive and positioning systems (3, 4) for the blanks as they move along a set trajectory (X - X') through the press and other machine(s), the press having upper and lower tool holders, and the machine(s) being equipped with cassettes for mobile and supplementary tools.
