Abstract (en)
[origin: EP1760198A2] The device includes a rear end arm cylinder (35) and an equipment carrier (36) for laying a rear end arm (30) which includes a rear end frame (31), support struts (32), a rear end carrier (33), a hinged crossbeam (34) and a mobile crossbeam bar (37). The rear end arm is connected over the rear end frame while support struts are connected to a bridge shifting vehicle. The rear end arm cylinder is supported in swiveling manner on the crossbeam bar to the upper end of the rear en carrier. The equipment carrier and rear end carrier are reciprocally arranged and fastened by a coupling unit (38).
