Abstract (en)  
A section of building construction twin shuttering panels (2, 3) define a void (8). One of the panels has a fixture (4) projecting into the void for a rising damp barrier. The panel inner faces are linked by a bridge (6) element. The bridge projects from only one side of the shuttering and incorporates a sheet metal bracket projecting into the void (8) and beyond both sides of the shuttering walls (2, 3).
