Abstract (en)

[origin: EP1760219A1] The system has guide rails made of plastic, and vertically arranged shank designed as upward open dual-flanks. The rails are arranged parallel to each other and at a distance corresponding to a width of plate-shaped units (1), and bars are inserted between the dual-flanks. A supporting frame (5) is provided with rectangle profiles (51), where the arrangement of the profiles corresponds to the desired arrangement of the rails.
