Abstract (en)
[origin: EP1760230A2] Lock comprises a closing device (11), a bolt (23) which moves between a locking position and an unlocking position, a blocking device (37) for blocking the bolt against movement in the direction of the unlocking position and a rotating device (29) having first control section (35) which interact directly or indirectly with the blocking device. Preferred Features: The blocking device is pre-tensioned in the direction of the blocking position. The blocking device holds the bolt when the blocking device blocks the bolt in the locking position.
