Abstract (en)

The device has a band-shaped part (2) provided with a mounting hole for fastening at a frame (1) of a component e.g. window, and fastened at a connecting piece that is fixed at an opening of a wall (7), where the part and the piece are adjustably connected with one another. A turned upper surface of the part is provided with uprisings that are formed in sprocket form, where the piece is made from a firm material e.g. metal.
