Abstract (en)
[origin: EP1760247A1] The cabinet has sliding vertical shutters each formed with a vertical terminal slat (21), where the slats are in contact with each other on their height in a closed position of the cabinet. Each slat comprises a lower end (22) and an upper end engaged in respective lower sliding rail (122) and upper sliding rail, and has a sliding glide (25) at its respective ends, where the glides are in sliding contact in the respective rails. The glides and the slats are realized in metal as a single piece, where a bottom (123) of the rail (122) has a convex profile.
