Abstract (en)
[origin: EP1760546A2] The device has a linear scale (2) with two parallel, adjoining linear scale sections (2.1, 2.2), and a guide units running between the sections. An organ (4) is movably attached on the guide units along the sections and is moved by a drive unit. A display unit (6) for time display on the sections is attached on the organ such that the display unit moves from one section to the other section when attaining an end of one of the sections. The movement take place partially erratic and instantaneously. An independent claim is also included for a watch in particularly wrist watch, comprising a time display device.
