Abstract (en)  
The upper case (1) has passages (7) at top wall and accommodates seal (2) with openings (9) and chamber block (3) with retention bar (15) such that the passages, openings and chambers (18) in chamber block are respectively aligned with one another. The seal sandwiches upper case and lower case with plugs such that the plugs extend into respective sockets in chamber. The lead wires pass through respective passages and opening to electrically connect with respective sockets and plugs inserted into sockets. An independent claim is included for a further electrical plug-and-socket connector.
