Abstract (en)

[origin: WO2005120300A2] A modular wall system (20) is provided for use in a healthcare facility to divide the available floor space into rooms and to support hospital equipment modules (24). The system (20) includes a plurality of frame units (100) configured to rest on a floor and extend vertically upwardly. The frame units (100) form a grid of vertically and laterally spaced apart wall spaces having a predetermined height (132) and a predetermined width (130). A plurality of modules (24) is configured to be positioned in the wall spaces to form a wall (26).
