Abstract (en)

[origin: DE202005014292U1] The device has a supporting device that exhibits a support traverse (1) over which the device is axially supported in the surrounding area of a wheel bearing. The traverse includes two support arms, at which a support unit (17) is arranged in a displaceable manner. The unit (17) exhibits a support foot (21), which is furnished with a support plate that includes a support lip (31), which is inserted between a wheel flange and a bearing housing.
