Abstract (en)

[origin: DE202006012879U1] Device for cutting paper sheets arranged in a stack (4) comprises a common drive unit for pressing jaws and a cutting blade so that the jaws lead to the blade to fix the stack before inserting the blade into the stack. Preferred Features: The stack lies on a support surface (3). The jaws and the blade move in a vertical direction (9) in vertical guides (10). The blade moves relative to the jaws against the pressure of a spring element using a pivoting lever (11).
