Abstract (en)
[origin: EP1762660A1] The device has a crash barrier (8) running along an edge of a road surface, where the barrier is turned towards the surface and includes a recess. A set of supports (5) is attached at a side of the barrier turned away from the barrier, and is supported opposite to a base (4), where the supports are fastened to the base. A tie-rod (18) is arranged in the recess of the barrier, where the barrier has a longitudinal groove (11) in between upper and lower ring fences. The tie-rod is arranged in the groove and fixed in the recess.
