Abstract (en)
The window has a polygonal or curve shaped bottom section embedded in a concrete, and provided between anchoring profiles of a frame designed as a hollow profile. A separation wall (3) exhibits different length between an inner surface of the outer wall of the section and a channel arranged centrally in hollow space of the section for receiving a reinforcement. The outer surface of the frame projects over a surface of the concrete has several stoppers (13) and receiver for a glass pane for clipping different units such as blinds, adapter profile, window sash and glass bars.
