Abstract (en)
[origin: EP1762689A2] Burglary protection device has a signal generator which, with the electrical signals conducting element forms an electric circuit with a capacitive or an inductively reactive element. The signal generator is designed as therein. The signal generator forms a resonant circuit with the electrical signals conducting element. Independent claims are also included for the following: (1) Burglary-resistant glass element; and (2) Application of burglary protection device.
