Abstract (en)
[origin: EP1762784A1] A lamp 1 has a standard 5, as well as a parallelogram construction 7, which is formed by bars 11-17, which can be turned around a vertical axis 27 and is hinged on the standard, and a lampshade 9 hinged on this. The parallelogram construction 7 is formed by two virtually parallel long bars 11 and 13 and two virtually parallel short bars 15 and 17, which are all hinged on each other. The long bar 11 extends past the parallelogram construction and is connected via the protruding part 11a to a weight 21, which can be pushed along and turned around the standard. The short bar 15 also extends past the parallelogram construction and is hinged via the protruding part 15a to the lampshade 9 or another object.
