Abstract (en)
[origin: WO2005122075A1] The invention relates to a method for producing a hydrophilic polymer, a prediction method, hygiene articles and other chemical products containing hydrophilic polymer manufactured according to the inventive method, the use of an inventive polymer in hygiene articles and other chemical products, the use of a computer-generated model to determine different variables, and a method for producing finishing products containing hydrophilic polymer, as indicated in the description and claims.
