Abstract (en)
Toothbrush handle (12) has a one-piece body (13) with hollow cavity (42) enclosed by a side (32). In the side are notches (30) set against each other which open out into the hollow cavity inside the brush. The handle is made from plastic produced by an injection moulding process using an injection moulding tool which has finger parts which, when the injection moulding tool is closed touch each other in sections and thereby form the notches and the hollow cavity on the hardened handle.
