Abstract (en)

[origin: EP1764175A2] The present invention pertains to a device (60) for in building facilitating exposure of hidden objects, such as boxes for electrical installations, which are to be exposed by providing a covering building unit (7), such as a plate-like wall, roof or floor unit, with holes. The device comprises a plurality of guiding holes (61, 62) for guiding of an exposing drill device (12) having a defined outer diameter, wherein said guiding holes are arranged with a distance to each other that does not substantially exceed half the outer diameter of the exposing drill device (12), such that after exposure of a first hole (110) with the exposing drill device (12) at least one further guiding hole is accessible for guiding of further holes.
