Abstract (en)  
The assembly has a hub (4) mounted rotatably about a central axis (X-X) in a rotary press, and units (8) for fixing a format adaptation sleeve (6) to the hub. The hub and the sleeve respectively have stop surfaces (16, 26). The stop surfaces are complementary and have a conical shape about the central axis. The hub has a supporting surface (18) and the sleeve has an inner supporting surface (28). The units (8) have a resiliently deformable hoop ring (32) which is interposed between the hub and the sleeve. The sleeve has a device for fixing a plate to the sleeve.

Abstract (fr)  
Cet ensemble pour presse rotative comprend un moyeu (4) adapté pour être monté en rotation autour d'un axe central (X-X) dans une presse rotative, un manchon d'adaptation de format (6) et des moyens de fixation (8) du manchon d'adaptation (6) au moyeu (4). Le moyeu (4) et le manchon d'adaptation (6) comportent chacun une surface de butée (16, 26). Les surfaces de butée (16, 26) ont une forme tronconique autour de l'axe central (X-X), et les moyens de fixation (8) comprennent un organe de calage radial (32) adapté pour être intercalé entre le moyeu (4) et le manchon d'adaptation (6). Application aux presses rotatives.
