Abstract (en)

[origin: EP1764319A1] The subject of the invention is an air track of high load capacity comprised of a double aluminium pipe (1) placed above a long rigid support (2) and of a glider (4) fit with an element (5) of considerable mass if compared to the glider's mass. The double pipe (1) of the track is pressed down to the support (2) through the medium of springs (3).
