Abstract (en)

[origin: EP1764576A1] The magazine (18) for non-cartridge ammunition, is at an automatic weapon (10) with a linear movement in a weapon housing (14), with an unbraked and defined recoil path on each shot. The magazine structure fixed at the weapon housing has a main magazine (22) for a large number of propellant bodies (24) and a main magazine (18) for a large number of projectiles (20). Moving with the weapon, during firing, is a part-magazine (26) for a small number of propellant bodies and a part-magazine (28) for a small number of projectiles matching the number of propellant bodies. The magazines can be a sticks, drums or belts.
