Abstract (en)
A gaming machine includes: a first game unit that performs a first game process for providing a first game to a first group of players; and a second game unit that performs a second game process for providing a second game to a second group of players. The first game unit performs the first game process including transmitting first game status information to the second game unit, the first game status information representing status of the first game. The second game unit performs the second game process including: receiving the first game status information from the first game unit; allowing the second group of players to bet on the status of the first game; and paying out an award to the second group of players based on the bet amount in accordance with a result of the first game.
