Abstract (en)  
[origin: EP1764869A2] Connection terminal has first connecting unit (1) which is formed with loop (11) and a second connecting unit (2), which is formed by a sleeve (20) manufactured from a small plate by deformation. The opposite edges of the sleeve are provided with counter balanced protrusions (23) or receptors (24) attached to the protrusions by which these edges are interlocked with each other. An independent claim is also included for the method for production of an electrical circuit.
