Abstract (en)  
[origin: WO2005120299A2] A modular wall system (20) is provided for use in a healthcare facility to divide the available floor space into rooms and to support hospital equipment modules. The system includes a plurality of frame units (100) configured to rest on the floor and extend vertically upwardly. The frame units (100) form a grid of vertically and laterally spaced apart wall spaces having a predetermined height (132) and a predetermined width (130). A plurality of patient care modules (24) is configured to be positioned in the spaces to form a wall (26) of the healthcare facility.
