Abstract (en)

[origin: WO2006002640A1] A method of estimating a parameter of a sports ball in flight which parameter is estimated on the basis of a determined or measured position of launch thereof. The launch position may be determined using path information relating to the flight path of the ball or an element used for launching the ball. Optionally, optical data, such as image data, and/or sound may be used for determining the launch position.
