Abstract (en)
[origin: WO2006007915A1] The invention relates to a motor vehicle door comprising an outer module (4) and an inner module (6), the inner module (6) having an inner door lining disposed on a supporting surface (8) of the inner module (6). The invention is characterized in that the inner module (6) has a carrier structure (10) provided with a metallic frame (12). The metallic frame (12) is joined to a plastic base carrier (14) so as to form a metal-plastic hybrid component (16) which simultaneously forms the supporting surface (8) of the inner door lining.
