Abstract (en)

[origin: WO2005123542A1] The invention relates to a metering valve (2) and a device (1) provided with said valve for metering out a preferably cosmetic liquid (3) and to a method for producing such a metering valve (2) and to the use of such a metering valve (2). The inventive metering valve is provided with a valve element (6) comprising a spring section (21) which is resilient in the direction of movement and carries a sealing element (14), thereby allowing an especially tight fit on a valve seat associated therewith when the inlet valve (9) is closed.
