Abstract (en)
[origin: WO2006005883A1] The invention concerns a spooler (1) comprising essentially a frame, said frame including at least one spindle (6) adapted to support at least one spool (8), said spindle (6) being mobile in rotation about a first axis substantially perpendicular to the diameter of the spool so as to draw and wind at least one yarn (7) in the shape of a spool (8), and at least one positioning and guiding device (5) adapted to position and guide at least said yarn (7) on the spindle (6) in rotation. The invention is characterized in that it further comprises a maintaining device (2) adapted to maintain said yarn (7) in contact with said positioning and guiding device (5).
