Abstract (en)
[origin: WO2006005385A1] The invention relates to a single-winged vacuum pump provided with a pot-shaped housing (12), a rotor (20) which is mounted in a rotational and eccentric manner in the housing, a wing (22) which is displaceably mounted in the rotor and in an orthogonal manner on the rotational axis (24), said wing subdividing a work chamber (18) into a pressure chamber (38) and into a suction chamber (36). The wing (22) also comprises at least one recess (44).
