Abstract (en)  
[origin: US2007245441A1] Armoured apparel is disclosed embodying a method of integrating the structure of armour with the structure of signal transmission means to enable that armour to be used as armoured protection for a wearer and for the signal transmission means and/or as a platform for conveying signals (e.g. for communication purposes or otherwise). Armoured apparel ( 1 ) is disclosed including armour means ( 5 ) arranged to shield a wearer of the apparel in use, and signal conduit means ( 8 ) is incorporated within the apparel for conveying signals therein, the signal conduit means being arranged such that the armour means shields both the signal conduit means and the wearer of the apparel in use.
