Abstract (en)

The applicator has a core (4) with a series of radiating supple teeth (14, 15) that have concave facing surfaces (10) forming cavities (11) that hold an appropriate volume of a product to be applied, especially to the eyelashes or eyebrows. The teeth can be made from the same material as the core and moulded in one piece with it, and each cavity extends only part of the way from the tooth tips to the core, and is wider at its open end.
