Abstract (en)
[origin: EP1768143A2] Hinge has a hinge leaf (4), which is swivelably supported around an axis (3) at a housing (6). A switching unit (2) is coupled with the leaf. A switching action at an installation switch (7) is released with the predetermined position, where a switching point of the installation switch is adjustable. A replaceable connecting unit is provided between the switching unit and the leaf for transferring rotary motion. The connecting unit is mounted at the leaf or the switching unit in different angular positions.
