Abstract (en)
[origin: WO2005120298A2] An equipment storage module (24) is provided for use with a modular wall (20). The modular wall (20) includes a plurality of frame units (100) configured to form a grid of vertically and laterally spaced apart wall spaces having a predetermined height (132) and a predetermined width (130). The equipment storage module (24) is configured to be positioned in one of the wall spaces to form a portion of the modular wall (20). The equipment storage module (24) comprises an enclosure (50) having a cavity (62) in which a patient care equipment (44) having a first connector (98) is configured to be stored. The enclosure has a second connector (66) configured to be coupled to the first connector (98) when the patient care equipment (44) is stored in the cavity (62).
