Abstract (en)
[origin: WO2006089730A1] The invention relates to a method for cleaning a metal strip (1). In order to improve cleaning of the strip, the metal strip (1) is initially subjected to a first high-pressure cleaning process (4) by means of at least one liquid jet in a first section (2) of a cleaning device (3), whereupon the metal strip (1) is subjected to an ultrasonic cleaning process (6) in a second section (5) of the cleaning device (3), the metal strip (1) being guided through a receptacle that is filled with a liquid in said ultrasonic cleaning process. The invention further relates to a device for cleaning a metal strip.
