Abstract (en)

[origin: WO2006010681A1] The invention concerns a circular vehicle wheel rim (26) for mounting a tyre, comprising a first seat (30) designed to be arranged on the inside of the vehicle and a second seat (32), the first seat (30) being axially extended towards the second seat (32) by a safety boss (40) and including a truncated base (34) locally merging with a circular cone (46) open towards the second seat (32) and coaxial to the rim (26), and an inner edge (36) extending the base of the first seat (30) towards the second seat (32), such that, on the side of the boss, the inner edge (36) of the first seat (30) is tangent to a circular cone (48) coaxial to the rim and open towards the second seat (32) by an angle greater than 103°.
