Abstract (en)

[origin: WO2006005441A1] The invention relates to an operating module for a motor vehicle, comprising an electric switch (10) in a housing (20). Said housing (20) comprises at least one elastically-deformable locking element (30, 31), in the locking position of which said housing (20) is retained in the correct position in a housing provided for the same. Each locking element (30, 31) is provided with a button (40, 41), accessible to the user, cooperating with the locking element (30, 31) such that on operation thereof the locking element (30, 31) adopts a released position against the elastic deformation thereof.
