Abstract (en)
[origin: EP1769693A1] The article has a tightening device (110) with a lateral lace strand including a lateral intermediate portion extending between two connecting points of a lateral quarter (102). A medial lace strand includes a medial intermediate portion extending between two connecting points of a medial quarter (103). A connector (160) connects the lateral intermediate portion of the lateral lace strand and the medial intermediate portion of the medial lace strand, where one of the lateral strand and the medial strand is slidable relative to the connector.
