Abstract (en)  
[origin: EP1770336A2] The arrangement has aligning units corresponding to predetermined areas of an individual pot support (1) and a disk-shaped heat shield (3) and provided for arrangement of the individual pot support at the heat shield. Spigots (8) are designed as the aligning units and are arranged at a peripheral area of the heat shield. The spigots are held in a recess of the heat shield and have a flange (14) at an edge of the recess. Base units (13) are designed as rubber knobs (10) that are held in a borehole (9) of a base body (6).
