Abstract (en)

[origin: WO2006012824A1] The invention relates to a method for producing dimethylaminoarglabine hydrochloride which is used as an agent during cancer therapy. The aim of the invention is achieved by virtue of the fact that parts of the plant *Artemisia glabella* kz. et kirg, which are above the ground, are treated after the air drying thereof, useless substances are eliminated, extraction and chromatography takes place, subsequently amination and then hydrochloride is formed in a reactor without repeated intermediate isolations, such as evaporation, filtration or dehydration, and with only one change of organic polar solvents.
