Abstract (en)

[origin: WO2006013424A1] A part (10) for supporting items in particular bottles comprises means (2) for retaining the item and means (4, 4) for pick up by the user. In particular, the pick up means may be moved between a home position and an operating position in which they are gripped by the user. Moreover, the retaining means comprise at least one element (2) for connection to the item, extending according to a radial axis (R), lying in the same plane as the pick up means (4, 4) in the home condition.
