Abstract (en)

[origin: US2005274687A1] A package for a personal care composition comprising: (a) a bottle; (b) a cap, wherein the cap is attached to the bottle; and (c) a shrink label, wherein the shrink label covers at least a portion of the bottle and a portion of the cap, and wherein the shrink label covers a gap between the bottle and the cap. The package can prevent water from accumulating between the cap and bottle when the package is used in a wet environment, such as the shower or bath, which can lead to the formation of mold and/or mildew between the cap and bottle. The package also can dissuade consumers in a retail store from unscrewing or otherwise removing the cap from the bottle, which can lead to leakage of the personal care composition onto the store shelves.
